WATCHMAN BARRIER MKII

The Watchman MKII Barrier is compact and easy to install. The system is modular, comprising bases, posts and planks for unlimited layout combinations.

Secure and weighted posts

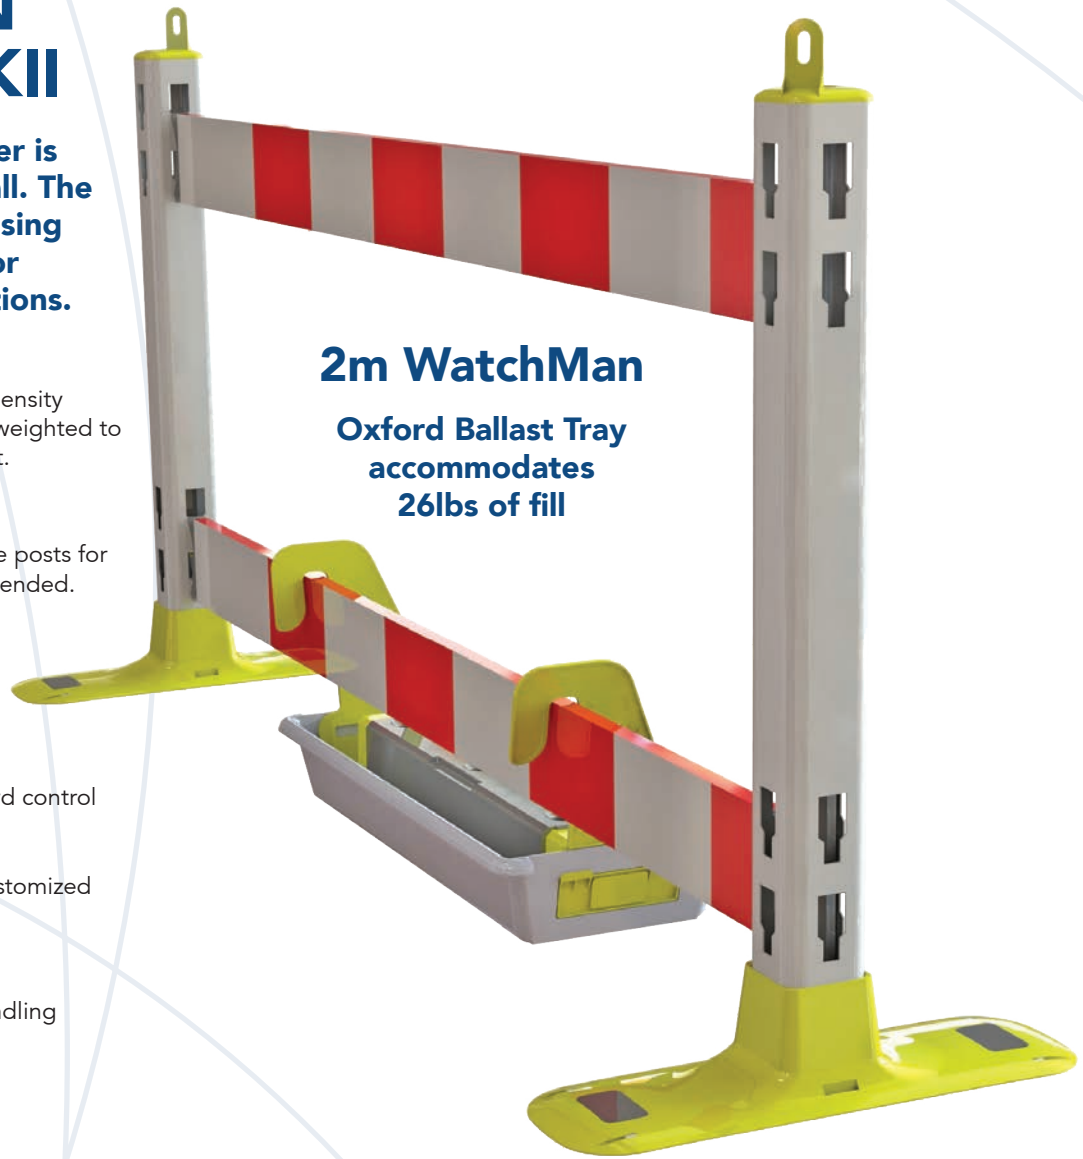

The barrier posts are made of high-density polyethylene (HDPE), and internally weighted to provide a strong and durable upright.

High visibility feet

The anti-trip hi-vis bases slot over the posts for added security when the site is unattended.

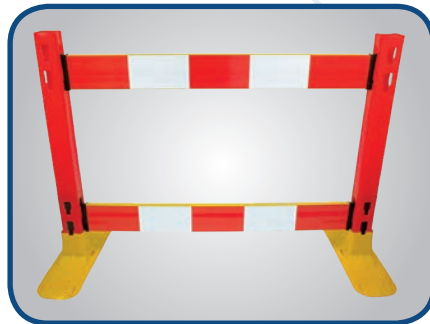

Features

- Planks available in 60" and 78"
- Weighted Posts
- Suitable for traffic control and crowd control
- Compatible with Watchman MK I
- Planks are reflective and can be customized with logos
- Made of tough HDPE
- Modular for easy transport and handling
- Individual parts available for sale
- 100% recyclable
